## ABOUT UNILEVER

With 3.4 billion people in over 190 countries using our products every day, Unilever is a business that makes a real impact on the world. Work on brands that are loved and improve the lives of our consumers and the communities around us. We are driven by our purpose: to make sustainable living commonplace, and it is our belief that doing business the right way drives superior performance. At the heart of what we do is our people – we believe that when our people work with purpose, we will create a better business and a better world.

At Unilever, your career will be a unique journey, grounded in our inclusive, collaborative, and flexible working environment. We don't believe in the 'one size fits all' approach and instead we will equip you with the tools you need to shape your own future.

## WHAT YOU NEED TO SUCCEED

### Experiences & Qualifications

- Deploy & maintain factory Cyber Security program as local technical authority
- Setup & maintain overall factory network architecture, both hardware & configuration
- Key member in pilot digital projects, maintaining a strong foundation layer, supporting a robust & sustained digital factory
- Build standards & know-how for upskilling factory engineers in term of IT-OT convergence & Cyber Security
- Coordinate & work with factory Data Engineer for setting up & maintain data pipeline as well as troubleshooting connectivity issues.

### Skills

- Technical background in telecommunication/ IT majors, focused on networking & data transferring
- Solid knowledge on network architecture, hardware connectivity & data transferring protocols

- Design thinking, logical reasoning. Cyber Security knowledge & skills are strong plus • Data literacy & familiar with industrial data collection such as SQL, OPC...
- Resilience, willing to expose yourself to shopfloor operation and working on short intensive sprints of project-based workstreams.
- Good English communication & Self-motivated, committed, and confident
